

Designed for better results and ease of use.

TPP Dish, Flask and Plate shared features:

- **Extremely flat and consistent surface, better microscopy and cell health.**
- **Vents between levels in stack for rapid temperature equilibration and greater consistency.**
- **Easy to read black alphanumeric markings and painted marking spots.**

TPP TC Flasks

- **No dead corners and a wider opening for improved cell retrieval.**
- **300 cm² flasks are the largest on the market.**
- **Steep neck ramp reduces chance of contamination.**

**“Swiss” focus on precision and quality.
They know that greater consistency in tissue culture
plastics improves downstream results.**

TC Dishes

- **Ridged gripping ring on base and interlocking stack makes handling dishes much easier. Never Drop a dish.**
- **Orientation Clock on base.**
- **Dual marking spots to ensure right lid on right dish.**

TC Plates

- **Dual marking strips give quick visual check for lid alignment.**
- **Larger wells and better Temperature equilibration greatly reduce effect in 96 well plates.**
- **Small scraper fits in 24 well TC plates.**
